About This Game

From the creators of Epic Battle Simulator, comes Epic Battle Simulator 2, the most accurate battle simulation game !

Form your strategies, choose your troops and place them wisely on the battlefield and beat every opponent !
Play against levels, custom and real-time multiplayer !

You can now totally improve your army, watch ragdoll effects and play multiplayer mode, created just for you with advanced matchmaking algorithms.

With the improved graphics and the enhanced intelligence of the bots, you can now experience ultimate battle simulations !

Features:

- Ragdoll and physics effects !
- Advanced army placement !
- Army upgrade up to three levels, with awesome gear and stats improvements !
- Advanced multiplayer ranking system for better matchmaking and custom leader-board !
- Well-made, improved graphics to make the battle cooler that ever !
- Smarter troops to achieve the most accurate battle simulation !
- Awesome sounds and music variety !

New troops added every week! Got a suggestion? Send us a message and maybe the new troop will be yours!!

Title: Epic Battle Simulator 2
Genre: Action, Adventure, Indie, Simulation, Strategy
Developer:
Rappid Studios
Publisher:
Rappid Studios
Release Date: 2 Nov, 2017

a09c17d780

Minimum:

OS: Windows XP SP2

Processor: 2 GHz or Faster

Memory: 1 GB RAM

Graphics: Intel HD 3000

DirectX: Version 9.0c

Storage: 200 MB available space

01.00 Nightstone Keep

Nightstone Keep is a location-based adventure for characters of 4th to 8th level, and is centered on a ruined, long-disused stone keep in a temperate wild forest area (possibly not far off a caravan road or forest trail). If you are using the Lost Lands campaign setting, Nightstone Keep is located in the northeastern extent of the Unclaimed Lands where they extend between the southern reaches of the Forest Kingdoms and the Cloments' Run. The Unclaimed Lands are detailed in *LEB: Borderland Provinces* by *Frag Cold Games*.

Avoid from the initial caravan gaw encounter, and any forest encounters or scuffling oversized spiders you wish to add for context, instead as player characters cautiously explore the ruins, this is a foray into a pliant colony, characters encounter and fight various plant creatures spawned and controlled by their parent arachnid, a gigantic sentient fungus wrapped around the main treasure of the adventure: a gem of vitality. This magic item is powering growth of the arachnid, so the giant fungus wants to keep it.

ITEM: Gem of Vitality

You should seed the adventure by having several NPCs encounter (at fairs, taverns, shops, or fairsides in wayside peddlers' camps) in which the characters are told lurid tales of the various battles and lost treasures and rumored hauntings of "ruined Nightstone Keep" and how it got to its present state, a history summarized hereafter.

02.00 Adventure Background

Nightstone Keep is a stoutly built stone stronghold atop extensive cellars stores and an extensive armory. Legend holds that the keep was built more than two centuries ago by Arnel Redband — "King Redband" — a self-styled local ruler.

Reidhard was a successful mercenary warrior and adventurer who made his fortune slaying dragons. He brought home a long caravan of wagons groaning under the weight of coins and gems and built Nightstone to be the seat of his new realm.

The farming fields of Redbandyn flourished while its founder lived but was torn by civil strife when the Redband died at a ripe old age. Factions led by his hot-tempered, young second son, his three grown sons, and his lord marshal of the guard in the name of Redband's oldest child (the Lady Isabelle) all drew swords and fought for the Redband's throne. Soon, the contested throne was black with blood. When the struggle finally ended, Queen Isabelle was a scarred wreck attended by a handful of faithful retainers on a lone farm near Nightstone Keep. The forest had taken over all of the deserted lands that now stood in what had once been Redbandyn — for everyone else was slain or fled. Then, the sickness came. A brown, furry growth crept along the walls, ceilings and finally the floors of the keep's cellars, making folk cough and choke, leaving them ultimately unable to draw deep breaths. They ended their days as feeble shufflers.

In the end, Isabelle and her few attendants packed a last wagon and departed for lands to the south, abandoning Nightstone to bandits, roaming beasts, and the elements. The bravest woodcutters and foresters explored the keep from time to time, finding large caches of coins and keeping alive the rumors of huge dragon riches still to be found, but no one tried to live in the keep.

These days, locals warn of giant birds that swoop from atop Nightstone's crumbling ramparts, snatching up and carrying off victims, so that now no one goes near it. Those still alive who

03.00 Nightstone Keep

From a distance, the ruined keep looks like a stout, square black shaft rising out of trees and clinging vines, with crumbling crannies featuring sharply pointed merlons that look like cracked and missing teeth. This unlikely tower is 80 feet square and roughly 110 feet tall. Its ground floor is windowless, with three floors above.

The vines are widespread but won't support the weight of even a child; they break off and crumple to the ground if any climber mounts them. None of the tree branches reaching close to the keep will be large enough to support human weight; they bend and then crack and dangle in splintered ruin if any character seeks to use them to reach windows or higher points on the keep's walls. The walls themselves are deep black and polished smooth, even after the passage of so many years, and can't be climbed.

The keep's once-stout wooden doors collapsed into ruin long ago, and in its place rotting heaps on either side of the opened entrance. There's a second open doorway on the facing wall of the keep that leads into a stone-walled, flagstone courtyard where wooden stable buildings long ago collapsed and vanished under the onslaught of trees, bushes, and vines. The way between both doors is a curving route, because squarely in the center of the keep, blocking the direct way, is a massive central pillar of fitted stone blocks.

I quite appreciate this superb solo implementation of the Adventure System Board Games. This digital option lets you enjoy the game when you do not feel like breaking out the big box with 300 tokens, 40+ miniatures, stacks of tiles, and a host of other game components.

My suggestion to anyone that chooses to play Tomb of Annihilation is to first pick up the DLC; however, enable none of it when you start a new game. And second, do not disable the bonuses the DLC grants you in Options. This will allow you faster progression while letting you look forward to opening chests. Rare materials matter and upgrading weapons and armor from your hard-won mats is most gratifying. For me, this is the best of both worlds.

Another recommendation is to pick only one or two characters and play through the adventures. I chose Dragonbait, a Saurial do-gooder who lives to kick butt and chew bubblegum--and man is he all out of bubblegum. Holy Avenger? Check. He and Artus Cimber are acceptable choices to main initially. I am currently running both Dragonbait and the Tabaxi Bard, Birdsong--weaker, but delightful in combination. Later, you can focus on building up other character combinations to create a larger party.

I hope they will go on to produce digital implementations of all the Adventure System Board Games. I would love to see Castle Ravenloft.

One personal quibble, I do not care for Jungle environments in any game. The interior dungeon tiles are more atmospheric and I do wish there was more diversity in the available habitats. I recognize this is due to the adventure taking place on the peninsula of Chult. Still, I look forward to more variations in future installments.. This almost fills the gap in my heart that DH left.. Tough game, like Super Meat Boy tough. But light-hearted fun :). Was expecting something similar to Lumines, or even Audiosurf. It just feels too rough around the edges and amateurish.

I know it's cheap, but so are a LOT of other, much more polished games.. A fun, light-hearted JRPG-like game. If you enjoy old school Final Fantasy and such, you'll enjoy this. Characters are likeable, music is amazing and the combat is fun.

The dungeons can get repetitive, but it's easy to forget about so it's not a big deal.
Considering how cheap it is, it's definitely worth the buy.
The main story + side quests can reach 15 - 20 hours depending on how speedy you are.

Finally, a FUN Battle Royale.. Awesome and addictive race game! This game will really test your reflexes and once you started and reached a certain amount of speed or score, you can't stop and want to try to beat your high score more and more :). Although this game is in early access, I'd say it's almost bug free!. Crashes a lot for no reason.. Edited: If you don't have Bitmap2Material I definitely recommend it. This program is almost magic when it comes to quickly creating/perfecting materials. Whoever does their image recognition software is a saint(too much?).

If you already own the original B2M:

Pros: Very similiar to the original Bitmap2Material but can output Roughness, Metallic, and glossiness.

Cons: Doesn't seem to improve image recognition (but it's still the best around).. Overall, pretty and pretty depressing.

Walking sim, collecting the picture pieces is too much of a chore for the achievement because it's too dark with low contrast so exploring is tedious, the environment too samey. The voice acting is good but the script is poor. The puzzles are a chore, you can walk past many of them and I most certainly did.

I hate to beat on an indie game that's clearly had some effort put in but it's a relief to finish the game rather than feeling like any kind of accomplishment.. There's honestly nothing better out there for game and desktop recording. That being said and before you flame this review and start calling me a fan-boy, let me explain. I've used A LOT of screen recording software, not just the mainstream ones that most people tend to use. Below you'll find a list of programs that I've used for various reasons such as desktop recording to show clients how to do something on their computer and game recording to save those epic moments.

Programs used:

Camtasia

Action

D3D Gear

Frap

BB Flashback

Bandicam

snagit

xspl

Most of said software I've used had very clunky GUI's, high system resource usage, huge video size output, lack of advanced settings, I mean the list just goes on and on... I also didn't mention that these too are all paid software and that I've tried free alternatives as well however I don't really need to go into which ones as I've tried most if not all of them.

Reasons why you should pick playclaw over all of the others:

Great developer that listens to reasonable requests

Fantastic GUI and easy to navigate interface

Basic and Advanced setting to make the software usable by everyone

One of the lightest solutions on system resources

MJPEG support recording at 95% is almost lossless with a very small file size based on length of video

New Technology being added all the time

Supports ALL of those popular encoders and decoders (NVENC, QUICKSYNC and H.264 ETC)

Hardware and Software encoding options (put the system usage load where you want it to be)

On-Screen Overlays are clean and customizable with text, color, position, amount of overlays that you want on/off

VERY Stable - I've NEVER had playclaw crash not once in the 4800+ Hours I've had it on.

Seriously though with all this being said, it's a no brainer to pick playclaw over everything else...

I've even purchased several copies for my kids as well to record their games, it's been worth every penny.. I loved this game. very simple game play, lovely story. Love the retro graphics. Worth playing
